

How to permanently leave a Dropbox folder

1. [Log in to dropbox.com](https://dropbox.com).
2. Hover over the name of the folder you'd like to permanently leave and click the "... " (ellipsis).

-
3. Click *Manage permissions*. **Important:** do not click "Delete" as that will probably delete the actual folder for everyone.

4. Click the dropdown next to your name.
5. Click *Remove my access*.
